Jaipur, Rajasthan

EDUCATION

B.Tech Computer Science
Jaipur National University
2024-2028
CGPA- 8.0/10

Senior Secondary
Sheonadi Sao College, BSEB
2020-2022
Percentage- 77.8%

SKILLS

- Python, SQL
- NumPy, Pandas, Statistical Modeling
- Scikit-Learn, LightGBM, XGBoost, Regression, Classification
- Matplotlib, seaborn, Plotly
- Streamlit, FastAPI, Docker, GitHub
- SHAP, Statistical testing
- NLP, Model Evaluation

LANGUAGE

English

Hindi

ABOUT ME

Focused on Data Science and Machine Learning, with hands-on project experience in data analysis, NLP, predictive modeling, and building data-driven applications using Python and SQL.

WORK EXPERIENCE

15 Aug 2026 - 26 Sep 2026
YuvaIntern
Data Science Project Implementation Specialist

- Took a data science project from planning through implementation in Python over six weeks.
- Completed the planned tasks and deliverables, receiving an overall score of 82/100.

5 Jun 2026 - 10 Jul 2026
YuvaIntern
Data Science Project Coordinator

- Planned a data science project from scratch, defining its scope, objectives, phases, milestones, and deliverables.
- Built a Gantt chart, resource plan, and risk plan.
- Completed five weekly tasks and received an overall score of 92/100.

PROJECTS

Citewell - AI-Powered Contracts and Financial Report Q&A
Python, FAISS, Sentence Transformers, Streamlit, Groq

- Developed a question-answering system for contracts and financial reports that returns answers with relevant supporting context.
- Tested 23 questions, achieving an MRR of 0.92, Recall@2 of 1.0, and faithfulness of 4.8/5 in self-evaluation.

ChurnScope - Customer Churn Prediction

Python, LightGBM, SHAP, FastAPI, Docker

- Built a customer churn prediction solution evaluated on a dataset of approximately 7,043 customers.
- Achieved a ROC-AUC of 0.856 and recall of 74%.
- Used SHAP for model explanations and integrated the model with FastAPI and a Streamlit dashboard.

LiftLab - A/B Testing and Statistical Analysis

Python, SciPy, Statsmodels, Plotly, Streamlit

- Built a dashboard to detect sample-ratio mismatches and compare frequentist and Bayesian A/B testing results.
- Implemented sample-size planning and monitoring, with 59 automated tests.

TriviaV - Emergency Triage Demonstration

Python, FastAPI, Scikit-learn, Streamlit

- Developed a demonstration that maps symptom-related inputs to four urgency levels and provides supporting explanations.
- Created 126 automated tests and evaluated performance on synthetic data, achieving approximately 93% accuracy.
- Intended for demonstration only; not a substitute for professional medical advice.
